

SOAP POUCH

Soap pouches are a great addition to any shoebox. These are very simple and inexpensive to make!

Items needed:

Terrycloth or bath towel
Sewing machine with thread

1. Cut terrycloth in a 4 ½" x 11" rectangle.
2. Finish two shorter edges of rectangle with a zigzag stitch.

3. With right sides together, fold one end of rectangle over 3 ¾". With right sides together, fold the other end on top of the previously folded end so that that the rectangle measures 4 ½" in length.

4. Sew both long sides of rectangle. Turn right side out and insert bar of soap into pouch.

HELPFUL HINT...A bath towel can be used to make 25+ pouches. Old bath towels work GREAT 😊 Be sure to place these in ziplock bags before putting into your shoebox so that everything does not smell like soap!
